While I very much enjoyed Ms Stanton's idea of using wall and ceiling space, I do have trouble with her notion of putting everything away. For extremely visual people, especially those of us with lousy memories, if a project or out-of-the ordinary object is "put away", it's gone away. I very much appreciate that she says it's okay to keep a few things with enormous emotional value--just not everything! Her idea of taking a picture is also great. I had some very fine antique china. It was beautiful and I loved it because it was my great grandmothers, but it could not be put in the dishwasher; so I seldom used it. I gave it to my much older cousin who remembered my great grandmother with great love. My cousin entertained a lot and didn't mind washing it. She sent me a picture of it all gleaming in her china cabinet. So as, Ms Stanton suggests, I was able to give something to someone who loves it; and I still have the memory of the item.

This book caught my eye when I was in the middle of a downsizing project. I've wanted to pass along unused possessions and organize what I keep. I have been trying to downsize and live a more simple life for a while now but I didn't really know where to get started. This was just the book I needed and it helped me figure out a much better much more simple life. I definitely recommend this book to everyone and recommend that people give this great lifestyle a try. The author did a great job.

As a homemaker with just enough space for me and family, this book is really for me and for those who also lives in a small house. This book made me realize that too much things inside the house means clutter. So, I have to get rid of the things that has no worth for me and can be useful for others.

This is helpful for someone who has no idea how to start decluttering. Easy to read and understand. I enjoyed it.

Good for getting started at downsizing
