Michael Recycle

Synopsis

Just in time for Earth Day on April 22, Michael Recycle tells the adventures of a young superhero whose power allows him to teach people about recycling. After cleaning up a town, the people declare: "To Michael Recycle! The green-caped crusader, our super-green hero, the planet's new savior!"

Age Range: 7 - 10 years

Grade Level: 1 - 5

Customer Reviews

I love this book. I bought this for my son when he was little and he adored it, and now it's one of my daughter's favorites. I purchased this while I was living in the South for a period of time, and there was no recycling available in the city. I purchased some recycling books so I could still teach my son about recycling, and this was definitely his favorite. The illustrations in this book are eye-catching and nicely done, and the story is entertaining and was able to hold my kid's attention. At the end of the book after the story, there is this really great page where it discusses "you part" and what you can do to help the environment. Fast forward 5 years, my son takes recycling and composting VERY seriously :)

I read this with my kindergartener at his doctor's office. It was in their waiting room. We then read it to his classroom. The children loved it so, we donated the book to the teacher's stash.

100% satisfied

My son's name is Miachel (yes, that is the way it is spelled) He loves this book and I love what it teaches him!

Easy to read and fun for kids approximately 4-6. The super-hero main character really draws kids in... the illustrations and fun rhyming keep them interested. Great book to use if you want to start conversation about recycling and other environmental topics. My kids love this book. Other favorites are the Garbage Monster and the Wartville Wizard. I do a lot of recycling presentations for young kids and find these 3 books to be awesome tools.

This is such a cute book! I used it during my environmental unit!

I love this book!

This book had great graphics and a wonderful message. Kids will love the rhyming of the lines and the rhythm of the book. In addition, there are many helpful ways kids can recycle found at the back of the book. I used this in my classroom to talk about the planet and keeping Earth clean!
