Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

wup wup wup! Nice book, my 2-year old likes it. The pictures are a little old as if they are from the 80s or 70s, that's the main bad thing about it. It shows helicopters flying high and fast, low and slow, in various terrains, the pilot, his cockpit, a glossary of terms, and some other stuff that I'm not remembering right now. A good value and fun for little kids.

This really is a great book for kids because it's real-life, interesting, and provides a variety of helicopter scenarios. It's not some dumb book that your kid will be bored with--you can go back to it again and again. Also, since it's this nice size and lightweight paper, my kid can easily flip through it herself and carry it around.

I sent this book sight unseen to my six year old grandson as a companion Christmas gift to a model helicopter. He's crazy about helicopters. When we spoke on the phone I asked him if he liked the

helicopter, meaning the model, but all he wanted to speak about was the book. The best review I can give this is his words not mine;"The book is so awesome, I'm going to read it again and again because I can't remember all the new things I'm learning about helicopters". As the expression goes, kids say the darndest things.

When my eldest child turned four last year, I bought this (along with some other books) for his birthday. It's tough to find books on helicopters, and this one is great. It is succinct and educational. It tells him enough about the individual parts of the helicopter and how it flies to keep him interested and intellectually stimulated, but it doesn't overwhelm him with too much detail. The pictures are nice, too. I particularly like that they are 'real' photos, as opposed to illustrations.

My 2 year old son loves this book so much, I had to buy 2 copies. He reads it several times a day and has the book memorized. It does a good job at explaining the various parts of a helicopter, which my son can now identify on all of his toy helicopters. My husband, who has loved helicopters since he was a child, even said that he learned a few things from the book.

My 18month old son loves this book! My husband and I both have it memorized we have read it so much!

Great book for our grandson

My 2 years old loves it. Real pictures are coupled with brief and accurate descriptions. It has become his favorite book. The issue is that it is not hardcover so I will have to buy a new one as it will worn out soon
