Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the

sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

I have a few of these field reference folding guides and have been pleased with most of them. This one is decent enough, with color pictures and some information. The main flaw with the guide is that it does not include pictures of both sexes; making it essentially half as effective as it could be. That's why I'm giving it 3 stars.

good book

This is on our kitchen table so we can identify the birds at our bird feeder.

No females just males. It has been helpful.

I suppose I didn't read the description closely enough, but instead of a booklet this is really just a brochure. A multi-folded 8" x 22" sheet of laminated card stock with bright, colored illustrations of birds with a very brief description. They are divided into categories such as "waterfowl", "nearshore & wding birds", and "perching birds" among others. It is a good basic guide, emphasis on BASIC.

Handy guide!

Very easy to use anywhere we go. My whole family joins in on the fun of discovery. If you need quick

A very handy reference guide when you don't want to bring the book. We also got Sibley's Eastern Warblers fold out card.
