Thinking About Architecture: An Introduction To Architectural Theory

Synopsis

In order to understand architecture in all its cultural complexity it is necessary to grasp certain basic concepts such as representation, form, and space. The aim of this book is to provide designers, teachers, students, and interested laypersons with a set of ideas that will enrich their conversation, their writing, and above all their thinking about architecture. Written in a conversational style, it introduces difficult concepts gradually, step by step. Architectural theorists and philosophers are mentioned in passing and their works are listed in the bibliography, but they are not the subject of the book. Architecture, rather than philosophy, is at the centre of the picture. The aim is to enable the reader to understand architecture in all its aspects, rather than to learn the names of particular theorists. The book is divided into eight chapters, each covering a particular aspect of architecture. Thinking about Architecture will be an invaluable standard introduction to architectural theory for architecture students, practising architects and interested general readers.

Book Information

Paperback: 160 pages

Publisher: Laurence King Publishing (October 19, 2011)

Language: English

ISBN-10: 185669755X

ISBN-13: 978-1856697552

Product Dimensions: 7 x 0.8 x 9.8 inches

Customer Reviews

Colin Davies is Professor of Architectural Theory at London Metropolitan University and the author of several books, including High Tech Architecture, The Prefabricated Home and Key Houses of the Twentieth Century (Laurence King, 2006). He has also written monographs on the work of Michael Hopkins, Nicholas Grimshaw and Norman Foster, and contributes to architectural journals worldwide.

Fantastic resource

An elegant presentation of usually obscure and hard-to-digest ideas. If not for the insight that it offers or the way in which it weaves together history, theory, practicality, read Davies' book for a master's lesson in how to be a servant teacher. It is a feat of clear communication.
