Customer Reviews

Founded in 1977 in Munich, Nelles Verlag publishes folded road and travel maps. Nelles uses special, easy-to-fold paper that allows thousands of refoldings without fraying. Nelles maps are highly readable, detailed relief maps with major roads and point-to-point distances clearly indicated. The maps include highly useful legends; city maps show tourist features such as hotels.

This map shows only major highways, large cities, and that's pretty much it. The romanization is a little strange too and not standard so it takes a while to figure out what something is -- for instance Seoul is Soul with a curvy thing above the u. Not useful and really a waste of money.

I bought this map as a teaching aid for an English class for Korean students. They thought it was pretty good, but I can't comment on accuracy. I did find it rather busy--the map attempts to show everything--topographical features, main roads, towns, historic sites, beaches, parks, mileage and so on. But there's not a huge amount of stuff out there on Korea, at least in the US, as it's not much of a tourist destination. Probably OK for planning a trip--probably you'd need something clearer if you were driving around.
