Jeffrey A. Frieden is Professor of Government at Harvard University. He specializes in the politics of international monetary and financial relations. Frieden is the author of *Currency Politics: The Political Economy of Exchange Rate Politics* and (with Menzie Chinn) of *Lost Decades: The Making of America's Debt Crisis and the Long Recovery*. His previous books include *Global Capitalism: Its Fall and Rise in the Twentieth Century*; *Debt, Development, and Democracy: Modern Political Economy and Latin America, 1965-1985*; and *Banking on the World: The Politics of American International Finance*. He is also the co-author or co-editor of many other books on related topics. His articles on the politics of international economic issues have appeared in a wide variety of scholarly and general interest publications. David A. Lake is the Jerri-Ann and Gary E.

Jacobs Professor of Social Sciences and Distinguished Professor of Political Science at the University of California, San Diego (UCSD). He is, most recently, the author of *Hierarchy in International Relations*. His other books include *Entangling Relations: American Foreign Policy in Its Century and Power*, *Protection and Free Trade: International Sources of U.S. Commercial Strategy, 1887–1939*. In addition, he is co-editor of 10 volumes and author of over 80 articles and book chapters on international relations, international political economy, and American foreign policy. He is Associate Dean of Social Sciences and Director of the Yankelovich Center for Social Science Research at UCSD. In 2013, he received the UCSD's Chancellor's Associates Awards for Excellence in Research in Humanities and Social Sciences.

love it

Just what I wanted.

Very nice!

Very good book, above my expectations, great summary of various ideas of various author, good to read and interesting. well done!

in a very good shape.

GAVE ME THE WRONG BOOK.

Frieden and Lake are two very well-established scholars in the IPE field. In this book they have presented 31 articles of academic journal quality in a manner that is accessible to students with little or no IPE knowledge. Having some fundamental knowledge of micro-economics, specifically comparative advantage (the underlying rationale as to why globalization is occurring and what it really is), can be helpful in understanding some of the subject matter. The book is divided into seven main sections: 1) Contending Perspectives on IPE, 2) Historical Perspectives, 3) Production, 4) Money and Finance, 5) Trade, 6) Economies in Development and Transition, and 7) Current Problems in IPE. As is evident from the sections in the book, this is a fairly thorough look at IPE, what it was, is, as well as what it could be in the future. Would be five stars but some of the articles were quite redundant (as is oft the case with books dealing with economic subject matter).

One will not find a better reader in the field of International Political Economy than Frieden and Lake's. Packed with classic articles from a variety of well regarded political scientists and fantastically edited with useful divisions made by topic and ideology, this reader is essential for any course at the university level in IPE. I would even recommend that international economics classes take a look at adding this text, as the political economy of free trade, the WTO, Transnational Corporations, etc. is discussed at length.
