MEPC: Optometry: Examination Review

Synopsis

This edition has been updated to reflect developments in optometry and related health-care fields. The material has been re-organized and new topics have been added. This work should provide a resource for the student and practitioner.

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 3.9 out of 5 stars 8 customer reviews

Best Sellers Rank: #691,212 in Books (See Top 100 in Books) #76 in [Books > Textbooks > Medicine & Health Sciences > Allied Health Services > Optometry](#) #108 in [Books > Medical Books > Allied Health Professions > Optometry](#) #136 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Ophthalmology](#)

Customer Reviews

McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide
Freddy W. Chang, OD, PhD Professor, Southern College of Optometry Memphis, Tennessee

Outdated material

I used this book sparingly during preparation for the NBEO Part I exam. It has questions, answers, and explanations. It was fairly helpful, but in retrospect, I probably didn't need this book.

This was a great product to review for boards. I think the questions are pretty similar and based off of the different categories of boards. It is great if you just want to go at your own pace. I got this book the semester before boards part one and have gone over a few questions every day to prepare. I would recommend this for anyone who is taking boards soon.

Good book and great amounts of questions to help review for NBEO Part 1. Covers a lot of different areas

This book is very helpful, although a bit variable in difficulty. The only problems I found were with the optics section, in which the model answers were of no help at all, only giving formulae and not showing the actual calculations. However, this shouldn't be too much of a problem if you have the relevant text books available. I was using this book for revision purposes for the English PQE part 1's so some questions weren't relevant, but there isn't one available at the moment so this will have to do.

This is a great collection of practice questions to help you prepare for Parts 1, 2, & 3 of NBEO. Covers all areas including public health & clinicolegal. Human biology section is somewhat easier than the board questions, and the optics section is pretty tough (but therefore pretty similar to the board questions!!). I found this book invaluable, as it is the only one of its kind out there. It is really great for testing yourself after studying a section.

There are no pictures, which in this field is almost required. However, it still is good for review, but I would suggest the review by Chern instead or use this along with it.

This book was a great review for NBEO Part I (which i just took). I would recommend this for all the second year optometry students studying like mad for the boards!! Good to use as a supplement after studying each subject.
