Customer Reviews

Dr. Goldberg is a Board certified ophthalmologist and Professor Emeritus at the University of Miami Miller School of Medicine. He is the author of Clinical Neuroanatomy Made Ridiculously Simple. Dr. Trattler is Director of Cornea at the Center for Excellence in Eye Care in Miami, Florida. He has authored many books, articles and textbook chapters, including the Clinical Microbiology Made Ridiculously Simple. In 2006, he was named one of the top 50 Cataract & Refractive Surgery opinion Leaders, as voted on by readers of Cataract & Refractive Surgery Today.

Excellent book

Very informative book for a person who knew nothing about the human eye.

Excellent

I read this book the first week of my ophthalmology residency and I thought it was awesome! It was a very concise review with some new points worked in. It has a limited life (will not be of help after

the first couple of months) but I think it is a must read for all new ophthalmology residents right before you start.

There is really not too much to say about this but requires so many words for the review. It is a great study guide.

The book is well written and straight to the point. Perfect for FP/IM clinical needs. The CD is great and has plenty of information that would otherwise require a lot more time to find.

Very informative, easy read.

The title makes it sound "simpler" than it is. It is an explanation but certainly not as typically dry and technical as the rest.
