A good book for young children. Describes different types of monkeys, concise enough to keep attention of preschoolers. Great pictures and map on the back.

I love National Geographic readers! They are awesome and very educational!

Kids love the books

I ordered 3 monkey books for my son who has decided he has a imaginary team of monkeys at his disposal (yes, a bit creepy). This "book" or mini magazine was fine, but it was so short and had only a few vocabulary words. We haven't read this one as much as the Amazing Animals: Monkeys by Valerie Bodden.

The National Geographic readers are popular with my students. They are bright and colorful.

My son's favorite book

Hang on Monkey! is filled with some of the most adorable monkey pictures ever! Young readers will love the simple sentences and squeal-able images of primates all over the world.

A great deal of information and wonderful pictures- map to show where monkeys live, discussion of what they eat, where they live and review at the end. Love it.
