Space Atlas: A Voyage Of Discovery For Young Astronauts

Synopsis

Young astronauts and astronomers will discover the wonders of outer space in this gorgeous atlas with lots of cool extras to explore! Six giant foldouts contain detailed maps of the moon, the constellations, our solar system, and the universe; a huge diagram of the International Space Station; and a guide to spacecraft. Mini-booklets provide even more in-depth information on a variety of topics, ranging from the phases of the moon to a timeline of Earth's evolution. Along with amazing color illustrations, beautifully detailed charts, and fun facts, Space Atlas also answers such pressing questions as "Are we alone in the universe?" and "Will we ever live on the moon?" to help curious children leap into the unknown.

Customer Reviews

We love this book. We have it for our 4.5 year old daughter and have gifted it to many friends.

Really cool book!

My daughter loves this book so much you can't even handle it she screamed when she got her for Christmas

Very nicely organized book with lots of fun facts for children and great organization and pictures.

Just wish some of their facts would have been more truthful. The millions of years is a little crazy.

Very cute book, well made and keeps my sons attention with the colorful illustrations.

My 7 year old son loved this book. He didn't put it down until he had read the whole thing!

My 6 year Astro-Physicist loved this book.

Fun, interactive book for kids ! My 5 year old loves it.

My kids are enjoying this book.
