Clarke's Analysis Of Drugs And Poisons, 4th Edition (Book + 1-Year Online Access Package)

Synopsis

Clarke's Analysis of Drugs and Poisons, 4th Edition is now being offered solely as a print and online package. It is a full book & digital package, consisting of the two volume reference book in a slip case, plus one year's individual access to the online version of Clarke's via MedicinesComplete, with all the attendant benefits, including updating annually. (A secure code will be included in the package enabling the end-user to access MedicinesComplete and setup their account and their 1-Year subscription) MedicinesComplete is produced and updated by Pharmaceutical Press. Clarke's Analysis of Drugs and Poisons is the definitive source of analytical data for drugs and poisons. Written by over 40 international experts, the resource also boasts an editorial advisory board of over 45 world renowned scientists. This reference work has been completely revised and updated for the new edition, and comprises two volumes. The book is essential for all forensic and clinical toxicologists, pathologists, hospital pharmacists, pharmaceutical analysts, clinical pharmacologists, clinical and forensic laboratories, and poison information centers. From the reviews of the previous edition 'Some things in life are worth the wait and truly this 3rd edition of Clarke's Analysis of Drugs and Poisons falls into this category' – 'the quality is superb' Australian Journal of Forensic Sciences 'Clarke has gained an international reputation as a reliable source of information for the analyses of drugs, and this new highly-expanded edition is the 21st century's successor.' Veterinary and Human Toxicology 'The content is comprehensive, absorbing and layout is well planned and executed. Without doubt, this volume will be a much well thumbed institution in any serious analytical laboratory and will assist generations of scientists in years to come.' Pharmacy Education

Book Information

Hardcover: 2736 pages

Publisher: Pharmaceutical Press; 4 Revised edition (May 17, 2011)

Language: English

ISBN-10: 0853697116

ISBN-13: 978-0853697114

Product Dimensions: 8.6 x 3.8 x 10.9 inches

Shipping Weight: 11.4 pounds (View shipping rates and policies)

Customer Reviews

Randall C. Baselt, Ph.D., Journal of Forensic Science, 2011. "This continues to be an invaluable reference for pharmaceutical scientists, clinical and forensic toxicologists and environmental chemists...Both the number of substances discussed in the monograph section and the depth of information presented are quite impressive." Dimitri Gerostamoulos, TIAFT Bulletin 41(2), 2011.

"Pathologists, clinicians, lawyers and students will find the new Clarke engaging, systematic in its approach and daunting in the massive amount of information provided. It is not until you become accustomed with the layout and logical style of the book that one appreciates the thought that has gone into producing this excellent and essential reference. No toxicologist should be without one!"

Gerhard K.E. Scriba, Department of Pharmaceutical Chemistry, University of Jena, Chromatographia, 10 July 2011. "The work provides a compilation and easy access to analytical data for numerous compounds that can give an overview without the need of an extensive database search. This is especially true for data of older compounds that cannot be easily found elsewhere...the reader is provided with substantial information making the work an incomparable reference book in drug analysis."

Clarke's Analysis of Drugs and Poisons is the definitive source of analytical data for drugs and poisons. This reference work has been completely revised and updated for the new edition, and comprises two volumes. Volume 1 has been greatly expanded from 31 to 44 chapters, providing extensive coverage of all methodology and analytical techniques. Of significant interest: Quality control and assessment separated into two chapters to reflect the differing situations of the toxicology laboratory versus the pharmaceutical industry (accreditation with ISO17025 becoming the international standard in labs as of October 2010) Method development and validation new to this edition since reliable analytical techniques and data should be of the utmost importance to any analyst Sampling, storage and stability Measuring and reporting uncertainty and Interpretation of results now included to cover all aspects of accreditation Pharmacokinetics now coupled with Pharmacogenomics. Volume 2 now contains: Over 2100 monographs detailing physical properties, analytical methods, pharmacokinetic data, ultraviolet, infrared and mass spectra, and therapeutic and toxicity data of drugs and poisons

More than 350 new monographs Expanded indexes and appendices include CAS numbers, empirical and molecular formulae, TLC, GC and HPLC systems data, as well as therapeutic class. This book is essential for all forensic and clinical toxicologists, pathologists, hospital pharmacists, pharmaceutical analysts, clinical pharmacologists, clinical and forensic laboratories, and poison information centres.
