Writing was good, scenarios interesting, and their resolution requires (for the most part) more than simply taking off and nuking the site from orbit. Per the publishers description, this is a series of scenarios intended for Traveller but would be adaptable to any other system without any great effort. As written, the scenarios require a "normal" group (ie no need for mechanized infantry companies, grav tanks, or 90,000-ton assault cruisers) of 3-6 players with transportation; for groups otherwise lacking transportation, description and floor plans of a useful vessel are provided. The scenarios themselves can be played individually or as an extended campaign, though the links might be somewhat tenuous between a couple of them. In one scenario, I was somewhat surprised

to see the outline of an episode from "Firefly" appear in a book published several years prior to the production of that TV series, but I guess great minds think alike. My confusion, concerning the titles of the book and this review, is only that I have not yet figured out what is particularly anomalous about the contents of the supplement, but it may just be that someone decided it was a better title than "Adventure Pack 04a3".
