# Who Eats What?: Food Chains And Food Webs (Let's-Read-and-Find-Out Science 2)

## Synopsis

What do you and a tuna have in common? You are both part of a food chain that begins with green things and ends with you! Can you get energy from sunlight? Why is every link in a food chain important? Read and find out more about food chains! Now rebranded with a new cover look, this book features content-rich vocabulary in simple, engaging text by Patricia Lauber, fascinating diagrams, and beautifully detailed illustrations by Holly Keller. Both text and artwork were vetted for accuracy. This is a Level 2 Let's-Read-and-Find-Out Science title, which means the book explores more challenging concepts for children in the primary grades and supports the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. Let's-Read-and-Find-Out Science is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

Average Customer Review: 4.6 out of 5 stars 28 customer reviews

Best Sellers Rank: #23,780 in Books (See Top 100 in Books) #16 in [Books > Children's Books > Education & Reference > Science Studies > Environment & Ecology](#) #36 in [Books > Children's Books > Growing Up & Facts of Life > Health > Diseases](#) #37 in [Books > Children's Books > Education & Reference > Science Studies > Nature > Environment](#)

Age Range: 4 - 8 years

Grade Level: Preschool - 3

## Customer Reviews

Ages 5^8. This Let's-Read-and-Find-Out Science book presents food chains and food webs on land and under water. Besides showing who eats what in the wild, it brings the food chain idea closer to home with the suggestion that children draw pictures showing the chains for the things

they eat, such as their milk, which came from a cow, which ate grass. Clear, simple ink-and-watercolor drawings illustrate the clear, simple text. Informative and intriguing, this basic science book leads children to think about the complex and interdependent web of life on Earth.

Carolyn Phelan --This text refers to an out of print or unavailable edition of this title.

What do you and a tuna have in common? You and the tuna are both parts of a food chain. This food chain begins with green plants and ends with you at the top. Every link in a food chain is important, because each living thing depends on others for survival. Patricia Lauber and Holly Keller will inspire you to draw your own food chains.

I purchased this for my 5 year old grandchildren to help explain the cycle of life's food chain. Very well written and a great price.

This book works well with the picture book "The Magic School Bus Gets Eaten" or "MSB Food Chain Frenzy". Best thing of all is the illustrations in this book -- they really convey the information. My kids really "get" it from the visuals.

Was a gift for my son and he loved it!

Great

The book was great

Book was in great shape.

I love all of the Let's Read and Find out Science books. They're colorful, age appropriate and heavy on the facts.
